203-833-0211 | sarahsvitlik03@gmail.com | Waterbury, CT | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL OVERVIEW

Full-stack developer experienced in building scalable web apps, REST APIs, and cross-platform mobile solutions. Skilled in **Python**, **JavaScript**, **Swift**, **Kotlin**, **SQL**, and **C/C++**, with hands-on work in authentication, backend architecture, performance optimization, and UI development. Focused on delivering clean, reliable, and maintainable software.

WORK EXPERIENCE

FRONTEND DEVELOPER | One Sky Collective, Glasgow

AUGUST 2025 – SEPTEMBER 2025

- Built UI components for a React-based mobile application.
- Improved interaction flows and aligned features with existing design patterns.
- Collaborated with engineering teams to maintain consistency across modules.

FRONTEND DEVELOPER LEAD | GBCS Group, Calgary, Alberta

JUNE 2025 – SEPTEMBER 2025

- Developed and maintained React + Next.js features for internal enterprise platforms.
- Diagnosed and resolved UI bugs, improving load times and reducing user-reported issues.
- Authored technical documentation and contributed to sprint planning and feature scoping.

OFFICE ASSISTANT | Naugatuck Family Chiropractic, Naugatuck

JUNE 2021 – AUGUST 2026

- Managed patient communication, scheduling, and digital messaging.
- Maintained organized records and supported daily clinic operations.
- Handled high-volume communication with accuracy and professionalism.

EDUCATION

Master of Science in Computer Science | University of New Haven, West Haven, CT

Expected Graduation: 2027

Bachelor of Science in Computer Science | University of New Haven, West Haven, CT

Graduated: 2026

PROJECTS

STATION ENGINE | Full-Stack Developer | [GitHub](#) | [Pitch Video](#)

Summary: Cross-platform system for managing radio station content across web, backend, and mobile.

- **Full-stack development** across web, backend, mobile, and desktop
- **Flask backend** for authentication, user management, permissions, REST APIs
- **MySQL schema** for users, songs, roles, analytics
- **iOS app** using Swift + SwiftUI (login, navigation, user interactions)
- **Android app** in Kotlin mirroring iOS functionality
- **C++ dashboard UI** displaying full media library
- **Azure Outlook Sign-In** integration

HABIT TRACKER | Full-Stack Developer | [Frontend](#) | [Backend](#) | [Demo](#)

Summary: Full-stack habit tracking app with real-time progress updates.

- **Vue.js frontend** for habit creation, editing, and progress visualization
- **Express.js + MongoDB backend** with REST APIs and data models
- **Performance optimization** and production deployment

Date Spark | Full-Stack Developer | [Github](#) | [Live Demo](#)

Summary: AI-powered iOS app for personalized date ideas.

- **Spin-the-wheel generator** and archive system
- **OpenAI chatbot** integration
- **Firebase backend** for auth and data storage
- **SwiftUI UI** with animations and interactive components

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Swift, Kotlin, C++, C, HTML, CSS, SQL
- **Frameworks & Libraries:** React, Next.js, Vue.js, SwiftUI, Flask, Express.js, Vite
- **Backend & APIs:** REST APIs, Authentication, API Integration, OpenAI API
- **Databases:** MySQL, MongoDB, Data Modeling, Schema Design
- **Professional Skills:** Cross-functional Collaboration, Agile/Scrum, Technical Documentation, Problem Solving
